1998 Isuzu Rodeo Engine

Isuzu introduced the five-door Isuzu Rodeo to the United States in 1990 for the 1991 model year. It was available with either a 2.6-liter inline-four engine rated at 89 kilowatts (119 hp) or a 3.1-liter V6 engine made by General Motors (GM) which had the same power output as the 2.6, but had more torque. An automatic transmission was available for the V6.

A timing belt failure is bad news because when the belt breaks, the camshaft stops turning and the engine dies. Worse yet, if the engine is an "interference" engine (one that lacks sufficient clearance between the valves and pistons if the cam stops turning), the result can be one or more bent valves (usually intake valves), and possibly a ...
