The Open Library has more than one million free e-books available. This library catalog is an open online project of Internet Archive, and allows users to contribute books. You can easily search by the title, author, and subject.

Audi Engine Mount Solenoid

Engine Light ON (or Service Engine Soon Warning Light) P1573 AUDI Meaning Left Engine Mount Solenoid Valve Open Circuit is the generic description for the P1573 Audi code, but the manufacturer may have a different description for your model and year vehicle. Currently, we have no further information about the P1573 Audi OBDII code.

P1573 Audi - Left Engine Mount Solenoid Valve Open Circuit

Its probably the passenger side engine mount. On the later TDI's the mount has a solenoid which controls the rigidity of the mount.. the way the mounts work is that there is a fluid chamber with a plastic body in the middle of it, with small channel cut through it. this allows fluid from the top chamber, through the plastic body, to the bottom chamber. the bottom chamber is rubber lined and can deform under pressure. there is also an airway vented to atmosphere, with a rubber membrane ...

Engine mount solenoid, what is it? | Audi-Sport.net

Oddly, there isn't technically a solenoid built into the mount, rather just a sensor which, when the mount starts to collapse, closes a circuit which then sends a fault code to the engine management computer. There have been a few different part numbers for this mount: 4B3 199 379K. and . 4B3 199 379M (current) - \$230.00

Vag-Com fault Code: 17985 - Right Engine Mount Solenoid ...

The motor mounts only have a solenoid in them, not a sensor. The faults can be open circuit, short circuit or overload. Now if you don't have any fault, then electrically its OK so this can not have an effect on engine running. But if the mount has leaked, then the mount has less damping effect than it should.
