Charles Darwin - Theory, Book & Quotes - Biography

Charles Darwin's theory of evolution by natural selection is the foundation upon which modern evolutionary theory is built. The theory was outlined in Darwin's seminal work On the Origin of Species, published in 1859. Although Victorian England (and the rest of the world) was slow to embrace natural selection as the mechanism that drives evolution, the concept of evolution itself gained widespread traction by the end of Darwin's life.
