Atlanta, they say, is the city that rose from the ashes of the Civil War. Now more progressive than many of its more conservative neighbor cities in the American South, Atlanta has grown into a national hub for transportation, technology, education, cuisine, commerce, and art. It is famous for its picturesque, tree-covered landscape, as well as for its striking buildings and homes. Since the ...

Biophilic design is a concept used within the building industry to increase occupant connectivity to the natural environment through the use of direct nature, indirect nature, and space and place conditions. Used at both the building and city-scale, it is argued that this idea has health, environmental, and economic benefits for building occupants and urban environments, with few drawbacks.

This is a list of the oldest buildings and structures in Toronto, that were constructed before 1920. The history of Toronto dates back to indigenous settlements in the region approximately 12,000 years ago. However, the oldest standing structures in Toronto were built by European settlers. Remains of a Seneca settlement may be found at the Bead Hill archaeological site, in eastern Toronto.

List of oldest buildings and structures in Toronto - Wikipedia

The Parthenon is the centrepiece of a 5th-century-BCE building campaign on the Acropolis in Athens. Constructed during the High Classical period, it is generally considered to be the culmination of the development of the Doric order, the simplest of the three Classical Greek architectural orders. The temple's harmonic proportions, precise construction, and lifelike
