Research with children and young people. Many of the ethics questions that relate to adults apply equally to children. Researchers should ensure that risk and harm in research is minimised and that adequate protection of children and young people is ensured. They should also consider the ethics implications of silencing and excluding children from research about their views, experiences and participation.

Research with children and young people - Economic and ...

Ethical considerations in research with children and young people occur at all stages of the research process. They should be considered as an ongoing and reflexive part of the research process throughout the life of a research project and not just as the first hurdle to be overcome.
