Geometry Problems and Questions with Answers for Grade 9. Grade 9 geometry problems and questions with answers are presented. These problems deal with finding the areas and perimeters of triangles, rectangles, parallelograms, squares and other shapes. Several problems on finding angles are also included.

Geometry Problems and Questions with Answers for Grade 9

Note. The `ST_NRings()` functions might be tempting, but it also counts the exterior rings of multi-polygons as well as interior rings. In order to run `ST_NumInteriorRings()` we need to convert the `MultiPolygon` geometries of the blocks into simple polygons, so we extract the first polygon from each collection using `ST_GeometryN()`.
