Global Environments Through The Quaternary

Global Environments through the Quaternary delves into the environmental changes that have taken place during the Quaternary: the last 2.6 million years of geological history and time during which humans have evolved and spread across the Earth. Taking the reader through the Pleistocene and the Holocene, the book describes the evidence that has helped us to

The Quaternary has been characterized by several periods of glaciation (the “ice ages” of common lore), when ice sheets many kilometres thick have covered vast areas of the continents in temperate areas.

Quaternary | geochronology | Britannica

Quaternary (/ kwə'tɜːrneri, 'kwɒt.ər,nɛr.i / kwə-TUR-nə-ree, KWOT-ər-nerr-ee) is the current and most recent of the three periods of the Cenozoic Era in the geologic time scale of the International Commission on Stratigraphy (ICS). It follows the Neogene Period and spans from 2.588 ± 0.005 million years ago to the present.
