Split Case Pumps | SPP Pumps

Most split-case pumps are axially-split - meaning that the flange at which the pump casing separates is in the same plane as the pump axis. Radially-split pumps are also available, and are commonly used in very high-pressure and high-temperature industrial applications (boiler-feed pumps are one common application for radially-split pumps).

Pumps! That's what it's about

It is the best of pumps; it is the worst of pumps. Horizontal split-case (HSC) pumps are used in most industries around the world to move large quantities of fairly clean fluids—usually water—at low to medium pressures. HSC design geometry poses numerous advantages and disadvantages for users. Advantages of HSC pumps:
