Guide to Hydro Power Major Components of a Hydro System A hydro system is a series of interconnected components: water flows in one end, and electricity comes out the other. This section provides a high- level overview of these components, from the water source to voltage and frequency controls.

An Introduction to Hydropower Concepts and Planning

Hydropower (from the Greek word hydor,meaning water) is energy that comes from the force of moving water. The fall and movement of water is part of a continuous natural cycle called the water cycle. Energy from the sun evaporates water in the Earth's oceans and rivers and draws it upward as water vapor.
