Green iguanas are diurnal, arboreal, and are often found near water. Agile climbers, Iguana iguana can fall up to 50 feet (15 m) and land unhurt (iguanas use their hind leg claws to clasp leaves and branches to break a fall). During cold, wet weather, green iguanas prefer to stay on the ground for greater warmth.

Iguanas: Biology and Conservation - California Scholarship

Iguanas tend to be arboreal and prefer large trees overhanging water, into which they dive to escape predators. Green iguanas are herbivores that feed on leaves, fruits and flowers. Juveniles will eat insects in addition to plant food. Preferred plants are hibiscus, orchids, roses, garden greens, squashes and melons.
