Reproducible science discussed at the Jupyter for Science workshop. Jupyter is the “Google Docs” of data science. It provides that same kind of easy-to-use ecosystem, but for interactive data exploration, modelling, and analysis. However, some work still needs to be done to make Jupyter the best interactive and practical tool for big science.

...

What we mean by “Reproducible Research” is the ability of repeating the same research “experiment” in any place with any person. Here the word “experiment” is more general than data acquisition or running a simulation and should be seen as the whole set of steps for achieving your research results.

Using the Science Interactive Notebook. I’m going to use this last section to describe how I used the interactive notebook in my classroom and provide you with some tips to ensure that your interactive notebook experience is a positive one. On the days that we had to cut and paste an INB template I would make it a warm-up.

Guide To Using Interactive Notebooks in the Science ...

The Science Behind Levers and Pulleys. Simple machines are usually divided into two types: inclined planes (ramps, screws, wedges) and levers (levers, wheel and axle, pulleys). A lever is a bar that rests on a turning point (or pivot). Levers can help you lift objects. A pulley is also used to lift objects.

The RYB or red, yellow, blue color wheel is typically used by artists, as it helps with combining paint colors. Then there is the RGB, or red, green and blue color wheel, which is designed for online use, as it refers to mixing light - like on a computer or TV screen. Canva's color wheel is an RGB color wheel, as it is designed for online use.
