Currently ISO welder qualification is in five parts to cover all materials, as well as a separate part to cover welding operators, while all of this is covered in ASME Section IX. Work is in progress with ISO to combine ISO 9606-1 for steels and four for nickel alloys as a move toward a better alignment with Section IX.

Welding in harmony: EN ISO 9606 becomes "official"

ISO 9606-1 was initially published in 1994, having been based on its European predecessor, EN 287-1. In 2004, whilst revising the Australian standard AS 2980, the drafting committee took cognisance of ISO 9606-1, incorporating many of its requirements into the draft. Consideration was given to adopting ISO 9606-1 at the time but this option

Review of EN ISO 9606-1 - Svetskommissionen

What is EN ISO 9606-1 The world of welding has taken another step along it's evolving path of European qualifications. The previous welding qualification of BS EN 287-1 has now been replaced by the latest offering, EN ISO 9606-1. This new qualification is very similar to the older 287-1 but has evolved to take care of a few loose ends that came about as a result of the EN 1090 rules governing ...
