### **PowerShell learning resources - PowerShell | Microsoft Docs**

PowerShell DSC can work in two modes: Push and Pull. Push mode is comparatively simple to configure and deploy. You simply write the configuration code as you might write a function, then execute it to create a MOF file. Thereafter, you can push the configuration as often as you like to its target (s) with the Start-DSCConfiguration cmdlet.

### **PowerShell Desired State Configuration | Learning Tree Blog**

PowerShell introduces over a hundred new commands, and that is a lot to learn when you first start. However, it includes a comprehensive help system that can help you find commands to accomplish tasks, and it explains how to use those commands. The command for getting help is get-help and it accepts a
