Miata Rear Defroster Switch Wiring Diagram

Yes, you can grab power from the rear defog at the switch or the power wire under the dash at relay for mirrors, most of these trucks come prewired, so if its an option they just add heated mirrors, the wires are all in place on the newer one, check yours and see, the only thing you would need if prewired is the switch and the mirrors.this being a 97 might not be prewired but like you said you can wire it, you have the right idea this way the mirror work when the defrost is on, i will see if ...

Rear defrost wiring diagram - Fixya

I recently bought a 1995 Miata -- convertible with hard top. the hard top has a rear window defogger, but there's no switch for it on the dash. how can I find out is there is wiring set up to put in a switch/button for it?

Wiring Diagram - Component List

I just discovered that the wiring for the JDM Eunos is different than the North American Miata. Early versions had the timer relay, 94 and after the switch under the steering wheel. To make it work on the Eunos (and keep the stock look) I need a rear defroster switch from a Mazda MPV or maybe a 626. That would be almost \$100.

At least now I have a rear defroster working! : Miata

My 1994 Miata came with a plastic rear window but wiring for a rear window defroster than ran to the rear deck, just below the window. I have just installed a new top that has an electric rear window (glass).

Today I'm showing you how to add the defroster / defogger functionality to an NA Miata with an NB soft top! If this helps you out, please let me know by hitt...

NA Miata - Adding Defroster / Defogger To My NB Glass ...

Defroster grids draw a lot of current (10 to 20 amps), and if the fuse is undersize, it won't last. If the fuse doesn't look blown, check with your voltmeter—with the key on and the defroster on, you should see 12 volts at both fuse terminals. If the voltage is fine, the problem is somewhere in the wiring or at the grid.
