engineering continues
to be an important
area of research for
physical modellers.

There were 13 papers
presented in this
session. These papers
and the direction of
future research in this
area are discussed in
this session report. This

Geotechnical engineering, also known as geotechnics, is the branch of civil engineering concerned with the engineering behavior of earth materials. It uses the principles and methods of soil mechanics and rock mechanics for the solution of engineering problems and the design of engineering works. It also relies on
