Today, we bring the advantages of leading-edge technology to thousands of publishers ranging from small businesses to industry giants throughout the world.

Rammed Earth Design Construction Guidelines

Rammed earth construction is a structural building method of compressing a sandy mixture into a hard sandstone-like material. Rammed earth walls resemble adobe construction. Both use soil mixed with waterproofing additives. Adobe, however, requires dry weather so that the bricks can harden (cure) enough to build walls.

Green Magic Homes The Green Magic Homes system has addressed these problems in an entirely new way, using the age-old methods of building with earth in conjunction with the space-age technology of ...

Here's the Dirt on a Prefabricated Plastic Earth Sheltered Home Design ...

Rammed earth homes are great because they use less energy and don't need as many building materials. Another option is using rammed earth, also called pisé, to build a home. For this, builders mix a combination of earth, sand and clay and compact it using a rammer. These sections, along with insulation, make the walls of the home.
