The 5-Color ink set (cyan, magenta, yellow, black, matte black) found in the imagePROGRAF iPF670 printer is ideal for technical applications. This ink technology utilizes four highly colorfast dye inks for producing bold, expressive color, plus two channels of pigment matte black ink for printing precise lines, smooth curves and small text on technical and office documents.

The rngd daemon, which is a part of the rng-tools package, is capable of using both environmental noise and hardware random number generators for extracting entropy. The daemon checks whether the data supplied by the source of randomness is sufficiently random and then stores it in the kernel's random-number entropy pool.
