### Mercedes w220 FRONT RIGHT Engine Compartment Shield ...

The engine splash shield is a plastic or metal protective panel installed on the underside of an automotive engine. The upper engine splash shield allows airflow to go to the intake while covering the belt, fans, sensors, and radiator. The lower engine splash guard, meanwhile, shields the exhaust and transmission systems.

### Engine Splash Shield, Front And Undercover, Lower Engine ...

Historically, this designation was used regardless of whether the entire engine was behind the front axle line. In recent times, the manufacturers of some cars have added to the designation with the term front-mid which describes a car where the engine is in front of the passenger compartment but behind the front axle.

### Front-engine, front-wheel-drive layout - Wikipedia

If water is getting into your vehicle's passenger compartment, check the rubber gaskets and weatherstripping around the windows, doors, and sunroof. Unless your vehicle has a protective shield under the engine area, here's an easy way to see whether anything is leaking out from under your vehicle and a few pointers to help you decide what ...

Engine oil has a distinctive smell (check your engine dipstick to get a whiff and compare), and feels thick and slippery to the touch. You can keep your oil level topped off if the leak is minor, but it's important to get even a small oil leak inspected and fixed sooner rather than later.

### What Fluid Is Leaking From Your Car? A Color-Coded Guide

If there is an oil leak, common sense tells you that it will be under the engine, but it's not always immediately obvious where your engine is located. Don't laugh: on a front-wheel-drive car, your engine could be located at the front left or front right, depending on where the transmission sits, and the engine could be in the rear of the ...
