rather Corollary 22.3, is surjective and continuous (the preimage of an interval is the set of all points between two parabolas), and, by Corollary

Munkres Topology Solutions Exercise

Exercise 1.1 Check the distributive laws for \cap and \cup and DeMorgan's laws. Solution:

Where To Download Solutions To Exercises In Munkres

Suppose that A , B , and C are sets. First we show that $A \setminus (B \cap C) = (A \setminus B) \cup (A \setminus C)$.

Proof. We show this as a series of logical equivalences:

$$\begin{aligned}x \in A \setminus (B \cap C) &\iff x \in A \wedge x \notin B \cap C \\ &\iff x \in A \wedge (x \notin B \vee x \notin C) \\ &\iff (x \in A \wedge x \notin B) \vee (x \in A \wedge x \notin C) \\ &\iff x \in A \setminus B \vee x \in A \setminus C \\ &\iff x \in (A \setminus B) \cup (A \setminus C); \end{aligned}$$

which of course shows the desired result.

Munkres - Topology - Chapter 3

Solutions Section 24 Problem 24.3.

Solution: Define $g: X \rightarrow \mathbb{R}$ where $g(x) = f(x) \circ i$
 $R(x) = f(x) \circ x$ where $i: \mathbb{R} \rightarrow \mathbb{R}$ is the identity function. Since f and $i: \mathbb{R} \rightarrow \mathbb{R}$ are continuous, g is continuous by Theorems 18.2(e) and 21.5. Since X is connected for all three

X be a topological space; let A be a subset of X . Suppose that for each $x \in A$ there is an open set U containing x such that $U \cap A$ is open in X . Show that A is open in X . Solution: Let C be the collection of open sets U where $x \in U$ for some $x \in A$. Suppose $U_0 = \bigcup_{U \in C} U$. Since X is a topological space ...
