Created by real editors, the category list is frequently updated.

The Pulse An Emp Prepper

The energy in an EMP is a huge, wide band pulse of radio energy that upon crossing a conductor induces a current. The same thing happens when the signal from your local radio station induces a current in the radio antenna, that is amplified and demodulated to hear the station.

7 Things That Will Survive an EMP - Ask a Prepper

EMP is not a single pulse for say. The pulse is made up of many different frequencies. EMP strength is also in question. Any un-shielded length of wire will act as an antenna and absorb energy based on the frequency in the pules and the length of un-shielded wire. Even shielded wire acting as a faraday cage around the wire (antenna) can be ...

Everyone should be preparing for nuclear war and fallout. If an EMP is launched no country will know if its a nuke or an EMP. If the power goes out in an EMP you probably have 10 minutes before REAL nukes (Mach 9 PLUS) start falling and another 10-15 minutes MAX to shelter in place from fallout if you are not killed in a direct blast.

EMP? Cyber Attack? Nuclear War? What Should We Be Prepping ...

All nuclear explosions create an EMP blast. But, some designs can cause a more significant EMP effect than immediate destruction. These designs are called "high-altitude electromagnetic pulse" (EMP) weapons. They explode high in the stratosphere. And they use the Earth's magnetic field to reflect and enhance the EMP effects.
